In addition to GAAP measures, this supplemental disclosure contains and refers to certain non-GAAP measures. We do not consider our non-GAAP measures included in our Glossary of Terms to be alternatives to measures required in accordance with GAAP. Certain non-GAAP measures should not be viewed as an alternative measure of our financial performance as they may not reflect the operations of our entire portfolio, and they may not reflect the impact of general and administrative expenses, depreciation and amortization, interest expense, other income (expense), or the level of capital expenditures and leasing costs necessary to maintain the operating performance of our properties that could materially impact our results from operations. Additionally, certain non-GAAP measures should not be considered as an indication of our liquidity, nor as an indication of funds available to cover our cash needs, including our ability to fund distributions, and may not be a useful measure of the impact of long-term operating performance on value if we do not continue to operate our business in the manner currently contemplated. Accordingly, non-GAAP measures should be reviewed in connection with other GAAP measurements, and should not be viewed as more prominent measures of performance than net income (loss) or cash flows from operations prepared in accordance with GAAP. Other REITs may use different methodologies for calculating similar non-GAAP measures, and accordingly, our non-GAAP measures may not be comparable to other REITs. Jeff Edison, Chairman and Chief Executive Officer of PECO stated: "The PECO team delivered another solid quarter of growth with same-center NOI increasing by 5.3%, and our portfolio reached new record highs in occupancy and renewal rent spreads. The continued strength of our operating performance is attributed to our differentiated and focused strategy of exclusively owning grocery-anchored neighborhood shopping centers and our ability to drive results at the property level through our integrated and cycle-tested operating platform, as evidenced by our Neighbor retention rate of 94% during the second quarter. Glossary of Terms

Term	Definition
Anchor space	A space greater than or equal to 10,000 square feet of gross leasable area (GLA).
Annualized base rent (ABR)	Refers to the monthly contractual base rent as of the end of the applicable reporting period multiplied by twelve months.
ABR Per Square Foot (PSF)	ABR divided by leased GLA. Increases in ABR PSF can be an indication of our ability to create rental rate growth in our centers, as well as an indication of demand for our spaces, which generally provides us with greater leverage during lease negotiations.
Comparable lease	Refers to a lease with consistent terms that is executed for substantially the same space that has been vacant less than twelve months.
Comparable rent spread	Calculated as the percentage increase or decrease in first-year ABR (excluding any free rent or escalations) on new, renewal, and option leases where the lease was considered a comparable lease. This metric provides an indication of our ability to generate revenue growth through leasing activity.
Cost of executing new leases	Refers to certain costs associated with new leasing, namely, tenant improvement costs and tenant concessions.
EBITDAre, and Adjusted EBITDAre (collectively, "EBITDAre metrics") ⁽¹⁾	<p>Nareit defines EBITDAre as net income (loss) computed in accordance with GAAP before: (i) interest expense; (ii) income tax expense; (iii) depreciation and amortization; (iv) gains or losses from disposition of depreciable property; and (v) impairment write-downs of depreciable property. Adjustments for unconsolidated partnerships and joint ventures are calculated to reflect EBITDAre on the same basis.</p> <p>To arrive at Adjusted EBITDAre, we exclude certain recurring and non-recurring items from EBITDAre, including, but not limited to: (i) changes in the fair value of the earn-out liability; (ii) other impairment charges; (iii) amortization of basis differences in our investments in our unconsolidated joint ventures; (iv) transaction and acquisition expenses; and (v) realized performance income.</p> <p>We use EBITDAre and Adjusted EBITDAre as additional measures of operating performance which allow us to compare earnings independent of capital structure and evaluate debt leverage and fixed cost coverage.</p>
Equity market capitalization	The total dollar value of all outstanding shares using the closing price for the applicable date.
Grocer health ratio	Amount of annual rent and expense recoveries paid by the Neighbor as a percentage of gross sales. Low grocer health ratios provide us with the knowledge to manage our rents effectively while seeking to ensure the financial stability of our grocery anchors.
Gross leasable area (GLA)	The total occupied and unoccupied square footage of a building that is available for Neighbors or other retailers to lease.
Inline space	A space containing less than 10,000 square feet of GLA.
Leased occupancy	Calculated as the percentage of total GLA for which a lease has been signed regardless of whether the lease has commenced or the Neighbor has taken possession. High occupancy is an indicator of demand for our spaces, which generally provides us with greater leverage during lease negotiations.
Nareit	National Association of Real Estate Investment Trusts.

Glossary of Terms

Nareit Funds from Operations Attributable to Stockholders and OP Unit Holders (Nareit FFO), Core FFO Attributable to Stockholders and OP Unit Holders (Core FFO), and Adjusted FFO Attributable to Stockholders and OP Unit Holders (Adjusted FFO) ⁽¹⁾	<p>Nareit defines Funds from Operations ("FFO") as net income (loss) computed in accordance with GAAP, excluding: (i) gains (or losses) from sales of property and gains (or losses) from change in control; (ii) depreciation and amortization related to real estate; (iii) impairment losses on real estate and impairments of in-substance real estate investments in investees that are driven by measurable decreases in the fair value of the depreciable real estate held by the unconsolidated partnerships and joint ventures; and (iv) adjustments for unconsolidated partnerships and joint ventures, calculated to reflect FFO on the same basis. We believe Nareit FFO provides insight into our operating performance as it excludes certain items that are not indicative of such performance.</p> <p>Core FFO is calculated as Nareit FFO adjusted to exclude certain recurring and non-recurring items including, but not limited to: (i) depreciation and amortization of corporate assets; (ii) changes in the fair value of the earn-out liability; (iii) amortization of unconsolidated joint venture basis differences; (iv) gains or losses on the extinguishment or modification of debt and other; (v) other impairment charges; (vi) transaction and acquisition expenses; and (vii) realized performance income. Core FFO provides further insight into the sustainability of our operating performance and provides an additional measure to compare our performance across reporting periods on a consistent basis by excluding items that may cause short-term fluctuations in net income (loss).</p> <p>Adjusted FFO is calculated as Core FFO adjusted to exclude: (i) straight-line rent and non-cash adjustments, such as amortization of market lease adjustments, debt discounts, deferred financing costs, and market debt adjustments; (ii) recurring capital expenditures, tenant improvement costs, and leasing commissions; (iii) non-cash share-based compensation expenses; and (iv) our prorated share of the aforementioned adjustments for our unconsolidated joint ventures. Adjusted FFO provides further insight into our portfolio performance by focusing on the revenues and expenditures directly involved in our operations and the management of our entire real estate portfolio. Recurring property-related capital expenditures are costs to maintain properties and their common areas, including new roofs, paving of parking lots, and other general upkeep items, and recurring corporate capital expenditures are primarily costs for computer software and equipment.</p>
Neighbor	In reference to one of our tenants.
Net debt	Total debt, excluding discounts, market adjustments, and deferred financing expenses, less cash and cash equivalents.
Net debt to adjusted EBITDAre ⁽¹⁾	Calculated by dividing net debt by Adjusted EBITDAre (included on an annualized basis within the calculation). It provides insight into our leverage rate based on earnings and is not impacted by fluctuations in our equity price.
Net debt to total enterprise value ⁽¹⁾	Ratio is calculated by dividing net debt by total enterprise value. It provides insight into our capital structure and usage of debt.
Net operating income (NOI) ⁽¹⁾	Calculated as total operating revenues, adjusted to exclude non-cash revenue items, less property operating expenses and real estate taxes. NOI provides insight about our financial and operating performance because it provides a performance measure of the revenues and expenses directly involved in owning and operating real estate assets and provides a perspective not immediately apparent from net income (loss).
Portfolio retention rate	Calculated by dividing (i) the total square feet of retained Neighbors with current period lease expirations by (ii) the total square feet of leases expiring during the period. The portfolio retention rate provides insight into our ability to retain Neighbors at our shopping centers as their leases approach expiration. Generally, the costs to retain an existing Neighbor are lower than costs to replace with a new Neighbor.
Recovery rate	Calculated by dividing (i) total recovery income by (ii) total recoverable expenses during the period. A high recovery rate is an indicator of our ability to recover certain property operating expenses and capital costs from our Neighbors.
Redevelopment	Larger scale projects that typically involve substantial demolition of a portion of the shopping center to accommodate new retailers. These projects typically are accompanied with new construction and site infrastructure costs.
Same-Center	Refers to a property, or portfolio of properties, that has been owned and operational for the entirety of each reporting period (i.e., since January 1, 2022).
Total enterprise value	Net debt plus equity market capitalization on a fully diluted basis.

Glossary of Terms

Underwritten incremental unlevered yield Reflects the yield we target to generate from a project upon expected stabilization and is calculated as the estimated incremental NOI for a project at stabilization divided by its estimated net project investment. The estimated incremental NOI is the difference between the estimated annualized NOI we target to generate by a project upon stabilization and the estimated annualized NOI without the planned improvements. Underwritten incremental unlevered yield does not include peripheral impacts, such as lease rollover risk or the impact on the long term value of the property upon sale or disposition. Actual incremental yields may vary from our underwritten incremental yield range based on the actual total cost to complete a project and its actual incremental NOI at stabilization.

⁽¹⁾ Supplemental, non-GAAP performance measures. See the "Introductory Notes" section above for more information on the limitations of non-GAAP performance measures.
